

# *Deliver The Experience*

Your audience has moved online. Major media companies are launching expanded digital media initiatives, while newly emerging media ventures, such as social media networks, are growing at a breathtaking rate. Reliably connecting audiences with rich media content and ensuring the best experience, regardless of demand or content size, requires a content delivery network (CDN) specializing in digital media distribution.

Limelight Networks is the most experienced CDN for the unique needs of large-scale streaming or delivery of digital media to PC's, or any Internet-enabled digital lifestyle device. Unmatched in the ability to deliver entire content libraries to audiences of any size, Limelight is the content delivery network of choice for the world's top media companies.
